## CAREER HISTORY

**Tech lead, Mavrix Technologies (now GiG); Marbella**                    **Jun 2016 - Now**

Since 2021 I started to lead different teams in the front-end department. Focused in building and maintaining high-quality software products, I support my team providing all the information and tools to develop the different tasks. I'm part of the hiring process and I help in the onboarding and mentoring of new members.

Member of different front-end development teams. Using JavaScript and its ecosystem to develop and implement new features for the different websites, collaborating with the business and designers teams. Involved in all the steps of the process, other tasks were maintain and improve the code base.

**Front-end engineer, Travelex Digital Lab; London**                    **Mar 2015 - Jun 2016**

Member of the e-commerce team, I was supporting the new digital strategy of the company building solutions for the web and mobile side.

Working in the new web solutions of the company using HTML5, Sass, AngularJS and Python.

**Dev engineer, blinkbox books; London**                    **Feb 2013 - Feb 2015**

Member of the web team, I have been working in a cross device Javascript API for an ebooks reader.

Also I work in the development and maintenance of the website blinkbox books using AngularJS, Node.JS, Express, SASS and other front-end tools.

**Front-end developer, Corbis Corporation; London**                    **Feb 2011 – Aug 2012**

For 18 months I was part of the Corbis EMEA Marketing Department, developing landing pages, microsites and minisites for different campaigns. Likewise I worked in the maintenance of the main sites of Veer and Corbis Images (including the redesign of the latter for the EMEA versions) and the production of email templates.

In addition, at Corbis I had the opportunity to work with different teams (back-end, front-end and testing) distributed around the world: Calgary, Seattle and India.

**Web developer, Freelance; London**                    **Oct 2010 - Feb 2013**

Since I left Spain I have been working on some personal projects, creating or maintaining freelance web projects using Wordpress or plain PHP code.

Many of these projects include the entire site creation process (excluding web design): advice, analysis, database, back-end, front-end, server configuration, installation ..

**Software engineer, Canales Corporativos; Valencia**                    **Jul 2009 - Sep 2010**

At this Spanish start-up I was involved in all processes of web page creation, developing an own CMS adjustable to customer requirements and other tasks like servers management, management of external teams or mentoring internships.

**Senior web developer, VG Comunicación; Valencia**                    **May 2007 - Jul 2009**

At this digital agency I worked with a small team of people developing web pages, being involved in all processes: database design, analysis, back-end, front-end, configuration, installation and maintenance.

**Junior web developer, Demini; Valencia**                    **Oct 2006 - Apr 2007**

As a member of the Product Team I was involved in some maintenance tasks and the development of new modules using a .Net environment.

**Internship software and web developer, Fire Department; Valencia**                    **Mar 2005 - Jul 2006**
I worked in the migration of the old management tool from an ASP and VB6 application to a new LAMP environment, developing some modules and helping in their maintenance.

**Internship software developer, Improven Consultores; Valencia**                    **Sep 2004 - Mar 2005**
After finish my studies at the University I worked at this consulting company helping in the development of a CRM system. I was involved in some maintenance and debug tasks using .Net technologies.
